

Open-telephony... Open your mind. Unchain your Asterisk!

BridgelT mini is your FIRST option when calling Skype™ contacts. No more hassle, no more hidden costs, no more complexity. Get ready to discover open-telephony by integrating Skype™ to your office or home environment.

- Friendly interface.
- Plug & Call.
- Easy contact management.
- Customer-centric approach.
- All-in-one using a Green technology appliance.
- Can support 10+ concurrent calls.
- Scalable autonomous solution for more concurrent calls.
- Fast ROI by reducing your telecommunication\infrastructure\power costs.
- Native integration for Skype fans.

Fast deployment. Easy to use. Money Saver. Are you ready?

Use it to make or receive calls. No need for special hardware. Plug & Call from your office or SOHO, without changing your equipment or calling habits. BridgelT mini will fit into your infrastructure transparently. Employees can benefit from it by calling Skype™ contacts for free. SkypeIn functionality included for those would like to get their Skype™ calls using their local telephone. Linux Core will proof your system's stability, will maximize performance and enhance Skype™ experience while you can enjoy easiness of use. Still not convinced? Use ANY SIP enabled device, or even soft-phones to call Skype™ contacts. View Skype™ missed calls at your office phone, as you always do with all incoming calls.

Technical Specifications.

- Maximum capacity for appliance: 10+ concurrent Skype™ calls.
- Scalable solution for more concurrent calls according to your needs.
