

Why Sangoma Cards

Giving you control, choices and flexibility

Clarity and Quality of Voice

As the first board manufacturer to integrate voice processing DSP's onto high quality/right priced telecom cards for Asterisk, Sangoma set the standard for all card manufacturers to follow. Sangoma has consistently set the bar high introducing low cost DSP's. Sangoma's excellence in hardware engineering resolved voice quality issues and enabled proliferation of Asterisk.

Canadian Designed, Engineered and Manufactured

Sangoma owns 100% of the intellectual property in our card designs and manufactures at our facilities under strict ISO 9001 standards.

Globally Adopted and Deployed

Global telecom certifications with over 10M ports shipped over the past 10 years to over 200 countries.

Stability and Scalability

By introducing DMA chaining, Sangoma revolution hardware design significantly reduced CPU bottlenecks and allows Asterisk to scale to much higher concurrent calls with stability.

The Widest Selection of Telecom Interface Cards

- » Largest variety to cater to any telecom projects.
- » Widest range of density: Choose from just a few analog ports (A200) to 16 T1/E1 on a single card.
- » Widest range of interface types: Analog, T1/E1, ISDN PRI, ISDN BRI, GSM, Transcoding.

They Are Not Just for Asterisk

- » Asterisk is a very good and popular telecom toolkit. All Sangoma cards work directly with Asterisk.
- » But integrators have other choices too. Freeswitch and API development are common choices. All Sangoma cards provide Freeswitch and API SDK options.

Why Sangoma Cards

Content continued.

It works with FreePBX too!

FreePBX (now sponsored by Sangoma) has direct board discovery and integration of Sangoma cards. Makes any installation a snap!

It All Works on WANPIPE

Wanpipe is the driver software that enables all Sangoma cards. All cards benefit from the same enhancements and fixes. It is also a great toolkit for integrators, providing granular view and tuning of the hardware that is so important for system optimization and troubleshooting.

Support for Linux and Windows Operating Systems

Global telecom certifications with over 10M ports shipped over the past 10 years to over 200 countries.

Lifetime Warranty

Deploy Sangoma cards in your projects in confidence anywhere in the world. Hardware fails sometimes, it's just a fact. We've got your back here.

Global Support from a Global Company

With support engineers in North America, Europe and Asia, you will receive timely support at any time of the day.
