

# Great news!

Sangoma is having a **global level promotion** of its Telephony cards. Seize the opportunity to **save up to 25%**. It's like buying a rocket for the price of a paper plane.

CARDS	PRICE REDUCTION
Analog cards: <b>A200, A400</b> ISDN cards: <b>A500</b> Wireless GSM: <b>W400</b>	<b>20%</b>
Digital PRI T1/E1/J1 cards: <b>A101, A102, A104, A108</b>	<b>25%</b>

## Why choose Sangoma cards?

### Superior voice quality, stability and scalability

- 100% of the intellectual property in card designs is owned by Sangoma
- ISO9001 compliant design and manufacturing process
- Canadian designed, engineered and manufactured
- Widest range of density - from just a few analog ports to 16 T1/E1 on a single card

### Full control over drivers – great toolkit for integrators

- All Sangoma cards are with Sangoma drivers (WANPIPE)
- Granular view and tuning of the hardware, important for system optimization and troubleshooting

### There's even more

- Compatible with variety of VoIP environments - FreePBX, Asterisk, FreeSwitch, Elastix, etc.
- Support for Microsoft and Linux OS
- Global technical support
- Lifetime warrantee

**SANGOMA'S MARGINS ARE UPFRONT AND LUCRATIVE | FAST DELIVERY, LOW TRANSPORTATION COSTS**
