FreePBX Academy

Open telephony boot camp

Press centar, Knez Mihailova 6, floor 3, Belgrade

FreePBX Academy topics

Introduction

- Introduction and history of Asterisk and FreePBX
- FreePBX setup and configuration (appliance, FreePBX distro)
- Initial configuration, modules management

Basic FreePBX configuration

- Extensions (phones), various types of phones (SIP hardphones, SIP softphones, ATAs, analog phones)
- Configuring trunks: Dahdi trunks (Sangoma and other telephony cards), VoIP gateways, SIP trunks
- Outbound Routes
- Inbound Routes, Ring Groups and Time Conditions
- IVRs and System Recordings
- User Control Panel (UCP)
- Administrative tasks (general settings, backup/restore)

Advanced Topics

- Asterisk security
- Mass deployment (bulk extensions, auto-provisioning)
- Networking concepts and SIP protocol
- Advanced SIP trunking - speakSIP
- Linux administration basics
- Asterisk CLI, Asterisk internals
- Troubleshooting

With over 1 MILLION production systems worldwide and 20,000 new systems installed monthly, the FreePBX community continues to out-perform the industry's commercial efforts. The FreePBX EcoSystem has developed over the past decade to be the most widely deployed open source PBX platform in use across the world.

Who will benefit from this course?

People selling, provisioning, and deploying open source PBXs.
IT professionals deploying PBXs in their own organization.
Telephony professionals and carriers exploring the world of open-source Asterisk-based PBXs.

Previous knowledge

Some prior exposure to Asterisk and FreePBX would be beneficial though not necessary.

Lecturer

Konstantinos Raissis, CTO at First Telecom

Duration

16 - 18 November 2015

9:30-17:30h
