

IP ready room

Seamlessly | Easily | Quickly

It's all about guest experience!

A special modular solution for hotels of any size.

**EARN FIVE STAR
REVIEWS**

**ATTRACT NEW
GUESTS**

**KEEP THE OLD ONES
COMING BACK**

If you want your hotel to be competitive and to stand out then you need your communication services to be extraordinary. This is easily achieved by following these steps:

Upgrade your PBX to IP PBX

and integrate voice mail, alarms, unified billing, room service, front desk management...

Add Wi-Fi access for every hotel area

with network separation and multiple user profiles that allows you to treat your VIP customers with premium Wi-Fi services

Add IPTV to each room

and turn a regular TV into a personalized entertainment tool, welcome your guests and promote your services

Install modern IP phones

that will match with your room decoration while using the existing cabling infrastructure

How can my hotel benefit?

No need for infrastructure investment

Our solution enables migration to IP easily and quickly. This transition is seamless and you won't experience interruptions in your daily activities. Did we mention that it can be integrated with your Property Management System (Fidelio, Opera, Protel...)?

Reduced costs

Until today, you had to contact several companies to provide telephony, Internet and communication services. Now you can find all of these at one place. It saves you time and money.

Personalized guest experience

Greet your guests with personalized greetings on IP TV screen. Promote your special offers - spa, gym, happy hours... Allow your guest to order room service, alarms, room cleaning, check in/check out of one screen.

Improved staff mobility and efficiency

Connect your personnel into one IP environment so they can be reached at any time at any device. This way your mobile staff can work and communicate easily and always be able to address guests' needs in a timely manner.

Higher profitability

Add a new line of profit by offering new, tailor made services for your guests. Use your IP TV as a bulletin board for additional, paid services.

Squall
Cloud Service
BOOST YOUR BANDWIDTH

Bandwidth is a finite resource and occasionally you might run out of it.

Check out the **Squall Cloud service** for hotels that creates aggregated bandwidth by bundling all your existing ISP capabilities.
